

From Hygienist to Hygienius:

Implant Maintenance Hands-On Master Class with Amanda Gallie and Emma Pacey

A hands-on Hygienius masterclass on implant maintenance for hygienists, dental therapists and GDP's takes place this November at Henry Schein HQ London. The day will focus on gaining a greater understanding of the science of implant dentistry. You will learn a system for successful peri-implant assessment, maintenance and active treatment as well as the additional verbal skills needed for effective patient communication. A day not to be missed !

- Intimate Full Day Hands-On Hygiene Master Class
- Limited to 20 delegates
- Networking and Shared Learning Opportunity
- 8 hours verifiable CPD
- Lunch and refreshments provided

What will be included?

- Discussing the theory behind and evolution of dental implants
- Identifying the structural components of dental implants
- Defining dental implant success and failure
- Demonstrating the differences between peri-implant mucositis and peri-implantitis

- Discussing the rationale for supportive peri-implant treatment
- Explaining protocol in the supportive treatment of dental implants
- Discussing instrument selection and hands on instrumentation around dental implants

Key learning objectives

- Understand the evolution of dental implants and the process of osseointegration
- Understand the differences required in the treatment approach of dental implants as well as that of different implant systems
- Understand the benefits of supportive peri-implant treatment with regards to the soft tissue changes that take place

- Understand the clinical complications that can develop at dental implant sites
- Make an accurate risk assessment of peri-implant health to aid in treatment decision making
- Select effective instruments and employ techniques to meet the instrumentation challenges around dental implants

About the speakers

Amanda Gallie is a Dental Hygienist and Therapist with over 18 years of experience during which time she has amassed a wide range of skills from hands-on clinical expertise to consulting, teaching and writing. Amanda previously taught Dental Hygiene at Kings College Hospital and has worked in specialist implant and periodontal practice. At present she is involved with an innovative orthodontic project looking at oral health and prevention and is a trainer for EMS Swiss Dental Academy as well as working in the Midlands as a hygienist and therapist.

Emma Pacey qualified as a Dental Hygienist and Therapist from Leeds Dental Institute. She divides her week between practicing at Specialist Dental Care in central London and working to promote public awareness of tooth wear as well as providing guidance for dental professionals in it's management at The London Tooth Wear Centre. She previously taught Dental Hygiene and Therapy at King's College Hospital for three years, practiced at Myatt's Field Community Centre and is completing a BSC at The University of Central Lancashire.
