## **Objective**

I wish to develop my career pathway in Dental Hygiene/Oral Health Science education, practice and with Industry partners.

## **Personal Objectives**

As a Hygienist over the last 15 years, I have gained many different skills ranging from hands on clinical experience, to developing interpersonal and communication skills. I have sort opportunities to work in different sectors of the Dental profession, including the NHS, Private and Specialist practice (Periodontics and Implants), the Hospital Sector and Industry. I would welcome the opportunity to share my experience and knowledge with others, whilst continuing to further my own education and expertise.

## **Employment/Appointments.**

## Special Achievements

*Stafford Miller Prize* – For highest theory mark attained in the Dental Hygienist Examination at Manchester University Dental School.

UK. Hygienist of the year 2007/ 2008 – Runner up

## Career Development

I take post-graduate education very seriously and I am very aware of the need to keep up to date and to share information on current trends, technologies and new research. I have been developing my presentation skills and delivered an abstract at the BSDHT National Conference in Nov 2007 in front of 800 people on behavioural change and communication models. Recent lectures have included the WAC and the CPD for DCP roadshow.

In 2009-2010 I lectured at various venues in the UK for the Swiss company EMS with a lecture entitled “New Concepts in Periodontal Therapy.” I also presented at The Dentistry Show with “ How to be assertive.” A personal development lecture. I serve on the editorial board for Preventive Dentistry magazine and have recently finished a year’s service on the BSDHT publications team.

I am now an elected council member for BSDHT.

Last year I Studied AS- level Chemistry in order to further my scientific knowledge base- and I am presently studying the Royal College of Surgeons Diploma in Dental Therapy.
